200H Salt Spray Test

Bravat products exceed the most stringent of testing and international standards. The 200H salt spray test is a standardized test used to measure corrosion resistance. Bravat's formulated plating technology has been proven to protect against corrosion with the ability to withstand 200 hours of rigorous salt spray testing without showing any visible signs of wear and tear.

Lifetime Warranty

Bravat uses only the highest quality components for their faucets. Bravat faucets are leak-proof and durable, exceeding the most rigorous testing of up to 800,000 cycles with no visible wear and tear. This exceeds a lifetime of maintenance free operation and peace of mind with Bravat's unique lifetime cartridge replacement warranty.
